

## MATERIALS AND FINISHES

MATERIAL	FINISH		THICKNESS		LENGTH <sup>1</sup>	
	METRIC	IMPERIAL	METRIC	IMPERIAL	METRIC	IMPERIAL
Steel	ZF075	L.Z.C.	0.457	0.018	1829mm	6'-0"
or	Z275	G-90	0.610	0.024	to	to
Aluminum	Plain or		0.762	0.030	7315mm	24'-0"
	Painted surface		0.914	0.036		

### Notes for liner panels:

- For lengths beyond this range consult Roll Form Group.
- Liner will be shop caulked unless otherwise specified.
- Liner will not contribute to the structural design of an insulated wall panel. All external load will be supported by the outer panel and be transferred through the sub-girists into the structure of the building.
- The liner will act as a vapour barrier when caulked at all side laps, end laps, penetrations and edges.
- Top side will be painted unless otherwise specified.
