

# ACOUSTIC DECK

**AVAILABILITY:** Profiles: S-15, S-30-8

**MATERIAL:** 22 ga. (.030"/.76mm) to 16 ga. (.061"/1.55mm) light zinc coated, galvanized and pre-painted steel with 1/8" (3.18mm) diameter perforations on 3/8" (9.53mm) staggered centers.

**LOADINGS:** Acoustic profiles will carry 10% less uniformly distributed load than the same profiles without perforations. (See load tables for unperforated profiles.)

**APPLICATIONS:** Factories, offices, community buildings, schools, gymnasiums and auditoriums. Also beneficial when used as a stay in place concrete form for slab venting.

**ADVANTAGES:**

1. Low cost compared to other acoustical treatments.
2. Standard decks may be mixed with acoustic decks for economy.
3. Easy to maintain.
4. High coefficient of sound-absorption.
