L-32 LINER

MATERIALS AND FINISHES

MATERIAL	FINISH		THICKNESS		LENGTH ¹	
	METRIC	IMPERIAL	METRIC	IMPERIAL	METRIC	IMPERIAL
Steel	ZF075	L.Z.C.	0.457	0.018	1829mm	6'-0"
or	Z275	G-90	0.610	0.024	to	to
Aluminum	Plain or		0.762	0.030	7315mm	24'-0"
	Painted surface		0.914	0.036		

Notes for liner panels:

- 1 For lengths beyond this range consult Roll Form Group.
- 2 Liner will be shop caulked unless otherwise specified.
- 3 Liner will not contribute to the structural design of an insulated wall panel. All external load will be supported by the outer panel and be transferred through the sub-girts into the structure of the building.
- 4 The liner will act as a vapour barrier when caulked at all side laps, end laps, penetrations and edges.
- 5 Top side will be painted unless otherwise specified.
